INSET "B"
T 2 S - R 32 W

This map was compiled from U.S. Geological Survey quadrangle maps, aerial photography flown in March, 1990, General Land Office maps, road inventory surveys June, 1998, and other map data.

This map was compiled using interactive computer graphic techniques.

This map was prepared on the Lambert conformal conic projection, 1983 North American Datum, North Zone, Florida system of plane coordinates.

The railroad station symbol as shown on this map does not necessarily denote the presence of a depot or live facility. It may be only a point designated for the receipt or delivery of freight, such as a platform or siding.

Local road segments in Delimited Areas and Residential Areas Under Development are not depicted.

In congested rural areas local roads are indicated by a single line only. For details refer to insets prepared for this county.

No attempt has been made to show all drainage canals and ditches.

Due to insufficient space land grants will not be identified by name on this county.

City populations are taken from the U. S. Census for 1990.

In 1990, the population of Escambia County was 262,798. There are 66 square miles in the county.

No claim is made for this basic cartographic source material taken from a work or works of the United States Government.

Most of this series are in the public domain. The maps are compiled and published using public law money and are copyrighted to prevent piracy and resale for profit.

Permission to copy or reproduce this map must be authorized by the Surveying and Mapping Office, Department of Transportation, Tallahassee, Florida 32399-0500.
