

This map was compiled from U.S. Geological Survey quadrangle maps, aerial photography from 1994, 2002, General Land Office data, road inventory surveys from 2004, and other data. This map was compiled using interactive computer graphic techniques.

The railroad station symbol as shown on this map does not necessarily denote the presence of a depot or freight facility. It may be only a point designated for the receipt or delivery of freight, such as a platform or siding.

Local road alignments in Delimited Areas and Residential Areas Under Development are not indicated.

In congested rural areas local roads are indicated by a single line only. For details refer to insets prepared for this county.

No attempt has been made to show all drainage, canals and ditches.

Due to insufficient space land grants will not be identified by name on this county.

Multiple numbers representing private claims indicate overlapping land grants.

City populations are taken from the U.S. Census for 2000.

In 2000, the population of Seminole County was 365,196. There are 321 square miles in the county.

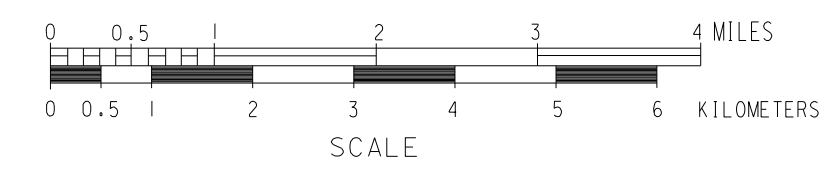

No claims made for the basic cartographic source material taken from a work or works of the United States Government.
