This map was compiled using interactive computer graphic techniques.

This map was prepared on the transverse Mercator projection, NAD 83, West Zone, Florida system of plane coordinates.

The railroad station symbol as shown on this map does not necessarily denote the presence of a depot or like facility. It may be only a point designated for the receipt or delivery of freight, such as a platform or siding.

Local road alignments in Delimited Areas and Residential Areas Under Development are not indicated.

In congested rural areas local roads are indicated by a single line only. For details refer to insets prepared for this county.

No attempt has been made to show all drainage canals and ditches.

City populations are taken from the U.S. Census for 1990.

In 1990 the population of Lee County was 335,113. There are 803 square miles in the county.

No claims made for the basic cartographic source material taken from a work or works of the United States Government.
